The **SERVOSTAR Pico Drive** is a part of the **PD Servostar Servo Drive Series** by **Kollmorgen**.

Specifications

Control inputs:
Addressing time (minimum): 24V / 7mA , PLC-compatible, IEC 61131

Ring core: 4ms

Power contactor: Ferrite rings for interference suppression
Internal temperature (Fan off): System protection device with phase monitoring < 55C

Last Verified: 12/21/2024 10:48 AM

Signal output: 24V / max. 500mA , PLC-compatible, IEC 61131

Graphics adapter: Windows compatible, color
Reversing mode: Operation with a periodic change of direction

Potential isolation: electrically decoupled, electrical isolation
Heat sink temperature (Fan off): < 60C

Supply inputs, to IEC 61131: 24V (18 36V) / 100mA plus total current of the outputs (depends on the input wiring of the controls)

ROD-interface: Incremental position output
Resolver/digital converter: Conversion of the analog resolver signals into digital information

Kp, P-gain: Proportional gain of a control loop
Brake resistor (internal) (Fan off): < 20W
