Shipping

One Year  
Warranty

The **QH1L034B-01D** is a part of the **Q SANMOTION Servo Amplifiers Series** by **Sanyo Denki**.

## Specifications

|                                             |                                                                       |                                         |                |                                     |            |
|---------------------------------------------|-----------------------------------------------------------------------|-----------------------------------------|----------------|-------------------------------------|------------|
| <b>Amplifier Volume:</b>                    | QS1A05                                                                | <b>Circuit Breaker:</b>                 | NF30 Shape 15A | <b>Control Power Supply Va:</b>     | 30         |
| <b>Environment Operating Temperature:</b>   | 0~55°C                                                                | <b>Environment Storage Temperature:</b> | -20~+65°C      | <b>Input Voltage:</b>               | AC 200V    |
| <b>Main Circuit Electric Wire Diameter:</b> | AWG12 or 3.5mm <sup>2</sup>                                           | <b>Main Circuit Power Supply (kva):</b> | 2.5            | <b>Motor Model Number:</b>          | Q1AA12100D |
| <b>Protection Functions:</b>                | Over current, Overload, Over voltage, Low voltage, Sensor error, etc. | <b>Rated Output:</b>                    | 1000W          | <b>Regeneration Process:</b>        | Built-in   |
| <b>Release Time (diode):</b>                | 140 ms                                                                | <b>Release Time (varistor):</b>         | 100 ms         | <b>Static Friction Torque (nm):</b> | 12         |
| <b>Last Verified:</b>                       | 08/22/2025 5:30 AM                                                    |                                         |                |                                     |            |
